Hi, I have a problem installing Pivot4J plugin in my Pentaho CE 8.0 while deploying it in Wildfly, Can someone help please? Mar 1, 2018 5:32 AM

I am trying to add Pivot4J plugin in my pentaho deployment. I am able to start Wildfly server and successfully deploy Pentaho 8.0 manually. When I deploy the application there are exceptions but when I login to pentaho the following **Exception 1** is thrown and when I click the Pivot4J menu in my Pentaho home page **Exception 2** is thrown. I have attached my log file,

Exception 1:

```
