Rik Bormans 4 posts since Feb 9, 2018

SAP Input in transformation crashes my DI spoon app Feb 9, 2018 9:24 AM

Until now I used Pentaho DI 6 without any problems to extract data from SAP via SAP input and RFC.

But whenever I try to use a higher version of pentaho, the app crashes.

I've installed the latest SAPJCO version (patch17) but still it crashes. Could anyone please help in this?

Re: SAP Input in transformation crashes my DI spoon app Feb 9, 2018 10:16 AM

If I create a new transformation I can add the sap input and use it. But when I reopen the spoon app it crashes on this transformation.

Re: SAP Input in transformation crashes my DI spoon app Feb 15, 2018 7:58 PM

Do you have a log file to see why it's crashing?

Otherwise, there is little we can help you with.

Re: SAP Input in transformation crashes my DI spoon app Feb 16, 2018 3:10 PM

This is the error image.

The screenshot shows the Pentaho Spoon interface with an error dialog box open. The error details window displays the following stack trace:

```

Re: SAP Input in transformation crashes my DI spoon app Feb 19, 2018 8:42 PM

Hi Rick,

Sorry to be a pain. Please run it again with higher level of logging. Then ctrl f until you find the error. Here just says it's crashed and that's it.

SAP Input in transformation crashes my...
