**Saiku 3.9 CE does not show subfolders in Pentaho 8.0** Dec 19, 2018 11:02 AM

Hello,

I have Saiku plugin (3.90 CE) installed on Pentaho 8.0. When I try to save a query or open a query I can only see home folder and public folder but I can't see subfolders. Anyone else facing this issue ? How can I solve it ?

Thank you.

I had a different problem with Saiku CE, latest from marketplace which should be your same version, and Pentaho 8.0.

My problem was I did not see any folder at all and this topic helped me

<https://github.com/OSBI/saiku/issues/601>

<https://github.com/OSBI/saiku/issues/601>

But, if you actually see some folders, it might be a different problem. How about security. Is it a vanilla configuration?

Thank you Virgilio.

Yes, my problem is different. I see only folders home, public and etc but not subfolders. I've tried to modify .jar files from the /saiku/lib as your topic recommends but the problem is not solved.

The thing is that I installed SAIKU manually (I downloaded the zip file and put in directly in ../pentaho-server/pentaho-solutions/system/saiku). I don't know if it can be the reason...

I installed the plugin the very same way, manual unzip + added license.

I would investigate in different ways:

- acls (can you save a cde dashboard in the folders you don't see from saiku?)
- any error in pentaho.log / catalina.out to get any additional clues
- developer console in chrome browser to see any javascript error while retrieving folder tree

Hi Virgilio,

ACLS

I am able to see all folders when I save cde dashboards

mmm

I have the same errors in catalina.out (I wasn't aware of those actually :-D ) and the ca.json produces a 404.

Saiku 3.9 CE does not show subfolders...

But when I click on folders in the save as dialog I do not see any error in the javascript console. I just see an http request (see the pictures). Do you have that one?

**Request URL:** http://127.0.0.1:8080/pentaho/plugin/saiku/api/pentaho/repository?type=saiku,sdb&path=/home&\_id=1545128995225  
**Request Method:** GET  
**Status Code:** 200 OK  
**Remote Address:** 127.0.0.1:8080

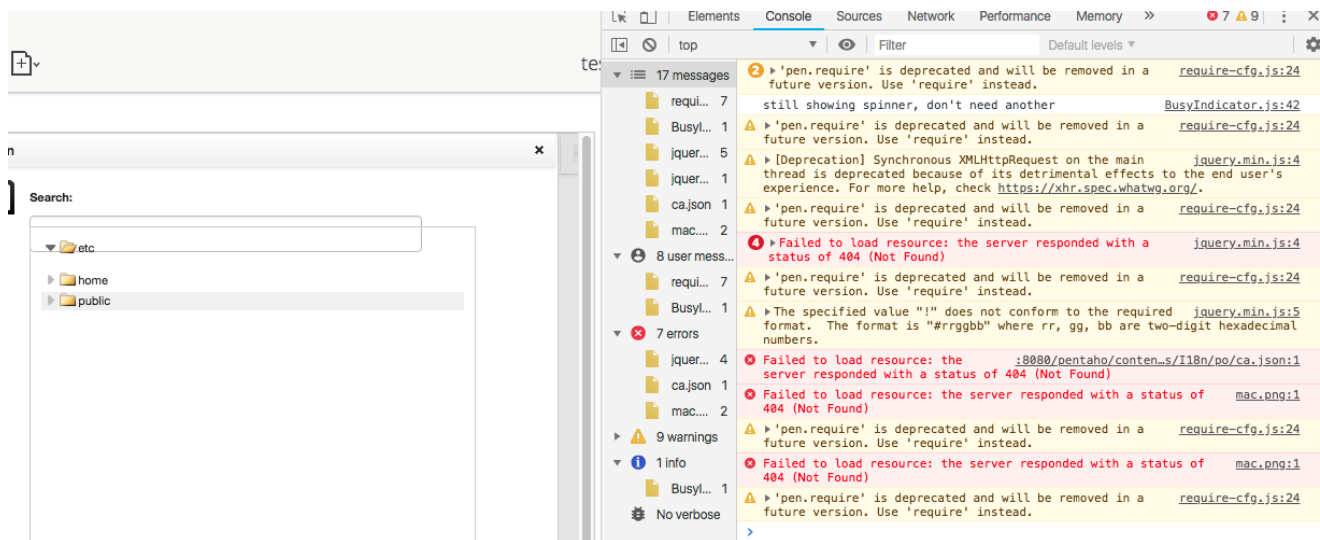

Anyway, I don't know what to do next...

Thanks Virgilio, I am not able to see the http request: where exactly do you check that? In my javascript console I see the following errors:

Do you mind to list the content of your pentaho-solutions/system/saiku/lib folder? Just to check if any component is different in my installation.

Thanks a lot for your time!

No problem, you have to go to "network" tab, 2 on the right from current one (which is console, then sources, then network).

Here is my listing

```
$ cd pentaho-solutions/system/saiku/
```

Thanks Virgilio,

I realized that you have in your installation Saiku plugin version 3.15

I've tried to change Saiku in my installation from version 3.9 to version 3.15 (updating cpf and cpk jar files) and now it works!

It looks that something is not working in version 3.9.

**Re: Saiku 3.9 CE does not show subfolders in Pentaho 8.0** May 8, 2019 7:52 PM

I FINALLY found the solution to this one, which I had tried to solve once in a while over the past few years.

This issue is easily confused with needing to copy the cpf-core, etc... files into saiku/lib, but is different. In that one, users just get "loading..." without showing any folders... In this issue, only "root" folders can be seen.

To fix, check some of the settings in saiku/ui/js/saiku/Settings.yaml. Namely check you REPOSITORY\_LAZY and EXTENDED\_REPOSITORY\_RESOURCE settings and restart....

. Working on 8.2 CE with latest saiku ce plugin.

Jon Quiros

Hi Jon,

thanks for the answer but I am not sure which are the values I should inform in these two properties:

REPOSITORY\_LAZY

EXTENDED\_REPOSITORY\_RESOURCE

I should change them from false to true?

Saiku 3.9 CE does not show subfolders...

Hello Mireya,

Yes, set both to true. It fixed the problem for me on 8.3 CE with Saiku 3.90.
