error opening transformation in new version 8.2.0.0-342 Feb 5, 2019 9:06 PM

I have a transformation built with version 8.0 that when I open in the new version I get the following error :

An unexpected error occurred in Spoon:

ioMeta

java.lang.NoSuchFieldError: ioMeta

```

at sun.reflect.DelegatingMethodAccessorImpl.invoke(DelegatingMethodAccessorImpl.java:43)
at java.lang.reflect.Method.invoke(Method.java:498)
at org.pentaho.commons.launcher.Launcher.main(Launcher.java:92)
```

I have installed the compare fields plugin in the plugins directory.

Has anybody else seen any comparable behavior in the current version ?

I have PENTAHO_JAVA_HOME set to the latest and last version of java 8

from spoon.log :

2019/02/05 11:14:06 - Spoon - **ERROR** (version 8.2.0.0-342, build 8.2.0.0-342 from 2018-11-14 10.30.55 by buildguy) : java.lang.NoSuchFieldError: ioMeta

Re: error opening transformation in new version 8.2.0.0-342 Feb 7, 2019 6:22 PM

You've probably already looked around for this, but all I found that seemed related was the following on Stack Overflow:

[debugging - NoSuchFieldError Java - Stack Overflow](#)

It seems that you could be in a similar situation if you've upgraded the software. As it states here "You've got old code that is referencing a field that no longer exists in the recompiled class files."
